Education

University of Bucharest, Faculty of Mathematics and Computer Science

Oct 2024 - Jul 2027

- 1st Year Grade: 9.73/10

Competitions

1st Place, Hackitall II (Procter & Gamble Challenge)

April 2026

[hackitall-ii](#)

- Engineered an **AI-driven procurement intelligence system** for Sourcing Buyers, extracting high-fidelity supplier data and risk signals from unstructured public datasets.
- Built a **transparency-first architecture** giving decision-makers verifiable evidence for every insight; designed, prototyped and pitched in a team of three within **24 hours**.

1st Place, VibeHack (Veridion Challenge)

March 2026

[vibehack-veridion](#)

- Won a large-scale **data intelligence challenge** by shipping a production-ready prototype that turns unstructured data into reliable insights, with a focus on **algorithmic efficiency**.

1st Place, Best Engineering Marathon (BestEM) — AI for Human Benefit

Dec 2025

[bestem-hackathon](#)

- Designed and prototyped a **human-centric AI solution** to a social challenge, combining **rapid prototyping** and user-centered design under competition constraints.

3rd Place, Cluj Hackathon 2026 — DoctoRO (HealthTech)

May 2026

[clujhackathon-2026](#)

- Built **DoctoRO**, an AI medical assistant that **transcribes live consultations** and auto-generates the structured *fisa consultatiei*, cutting the documentation time physicians spend per patient.
- Added **QR-based record ownership**, giving patients portable access to their full medical history; **second consecutive podium** at Romania's largest hackathon with the same core team.

3rd Place, Cybersecurity Competition, EESTEC Olympics 13th Edition — Organized by Bitdefender

October 2025

[EESTEC Olympics](#)

- Placed 3rd with **Team Hackelina** in a **Capture the Flag (CTF)** contest among teams **hand-picked by Bitdefender**, exploiting and patching real-world vulnerabilities in networked systems.
- Hardened **protection modules** live under attack while breaching competitor services, across two stages totalling over **20 hours** of continuous analysis and defense.

3rd Place, Cluj Hackathon 2025 — Emergency Response App

May 2025

[clujhackathon](#)

- Built **AngelAI**, an AI voice assistant giving real-time guidance in emergencies, **cross-platform** (web + Android) on **React**, **Node** and the **Google Maps API**.
- Integrated **ElevenLabs** voice interaction for hands-free assistance and **country-specific emergency numbers** across **30+ countries**.

Experience

Junior AI Engineer, HazelHeartwood

Jan 2026 – Present

- Architected and deployed production-ready **Retrieval-Augmented Generation (RAG)** systems, leveraging vector databases and LLMs for context-aware synthesis

over complex enterprise datasets.

- Developed and deployed **full-stack AI applications** end to end, owning **DevOps** and **Azure** cloud deployment alongside the AI layer.
- Integrated **Generative AI pipelines** into existing business workflows, improving decision-making speed and data accessibility.
- Built custom **AI agents** and toolsets in **Python** and **LangChain**, integrated into client infrastructure.

Projects

MF Hub — AI Fundraising Platform (In Production)

github.com/Marius0G/mf-hub 

- Built and shipped an internal fundraising platform **running in production with 40+ volunteers**, centralizing the full corporate outreach pipeline from prospecting to signed partnership.
- Integrated **AI-assisted workflows** — company research, personalized outreach drafting and follow-up tracking — to streamline collaboration with partner firms and remove manual admin work.

Synthetic-Data Drone Detection (Computer Vision & Unity)

github.com/Mosquito-Control/system5-unity-simulation 

- Trained a **real-time drone detection vision model** entirely on **synthetic data**, removing the dependence on costly, hard-to-obtain real aerial footage.
- Engineered a **Unity simulation pipeline** over a full **3D model of Hong Kong**, procedurally generating auto-annotated imagery across varied altitudes, lighting and weather, then benchmarked **sim-to-real** generalization on unseen scenes.

AI-Enhanced Smart Soldering Station (IoT & AI)

- Built an automated soldering workstation on the new Arduino Uno Q in collaboration with **Zalmotek**, pairing hardware with intelligent software automation.
- Engineered a **voice-activated control interface** for power and lighting, plus sensor-driven logic for **automatic fume extraction** on tool use.

Core Competencies

Languages: English (C2), Romanian (Native)

Programming Languages: Python, C++, C#, Java, JavaScript, HTML, CSS, SQL, Assembly x86, Bash/Shell

Frameworks / Tools: React, Node.js, REST API, LangChain, Unity, **Azure**, **DevOps** / **CI-CD**

Extracurricular

Management & Fundraising Director - ASMI Bucharest

Sep 2025 - Present

Led the volunteer fundraising team, setting **corporate outreach** strategy and **representing the organization** in partner meetings — **securing over 20 partnerships** and support agreements.

Management & Fundraising Volunteering - ASMI Bucharest

Nov 2024 - Sep 2025

Secured partnerships for major university projects through **company outreach** and **event networking**, building foundations in **project management** and **fundraising**.
